each circle represents area of around 10000 ha

RESULTS

Number of sunflower hybrids of different types registered in Serbia in 2019.

Total amount of attested sunflower seeds available on the market was 1.87 million kg.

- there is a high demand for **mid-early and mid-late oil hybrids**
- share of seeds of high-oleic hybrids was around 2%
- most of farmers grow herbicide-tolerant sunflower
- the share of seeds of confectionery sunflower was small, around 0.2%. Yet, seed quantity implies to considerable demand for confectionary sunflower by the food industry.
